## Stroke Program | 2022 Outcome Report

# GAYLORD'S STROKE PROGRAM:

We bring together an array of resources, **advanced technology**, plus a team of **highly experienced providers**, to offer each stroke patient an individualized approach to treatment.

Our inpatient and outpatient programs are designed to support patients at each stage of their recovery, helping them adapt to their post-injury lives, **maximize their independence** and reenter their communities.

Since every stroke is different, our interdisciplinary team will customize a program based on the patient's specific needs, especially if the patient is part of the **Young Stroke Program**.

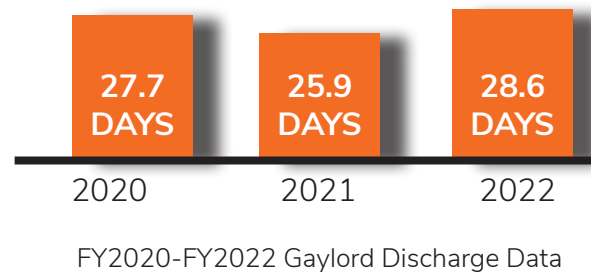

# ABOUT GAYLORD HOSPITAL:

A nonprofit, 137-bed specialty hospital, also known as a long-term acute care hospital/LTACH, Gaylord specializes in medical management and rehabilitation for patients who have experienced an acute illness or a traumatic accident.

Gaylord is among the best in the country at helping patients recover and return to their highest quality of life. From simple to catastrophic situations, we bring together all our clinical resources to deliver the best possible outcomes.

By offering a continuum of care from inpatient to outpatient services, Gaylord can meet the needs of our patients through every stage of recovery.
