Spinal Cord Injury Program
2024 Outcome Report

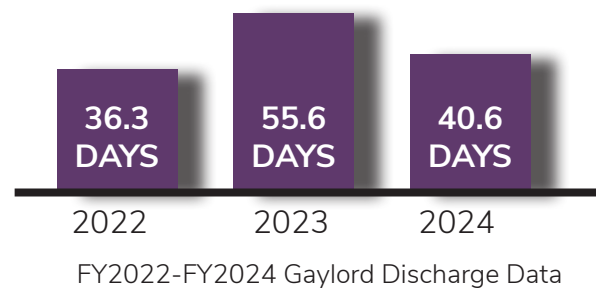

GAYLORD'S SPINAL CORD PROGRAM:

We bring together an array of resources, **advanced technology**, plus a team of **highly experienced providers**, to offer each patient an individualized approach to treatment.

Our inpatient and outpatient programs are designed to support patients at each stage of their recovery, helping them adapt to their post-injury lives, **maximize their independence** and reenter their communities.

Since every spinal cord injury or illness affects a person differently, our **interdisciplinary team customizes** each program based on the patient's specific needs and discharge destination.

Spinal Cord Program Average Length of Stay

Spinal Cord Program Age of Patients Served

Age <22	4 patient	2.7%
Age 22 - 35	11 patients	7.6%
Age 36 - 55	33 patients	22.9%
Age 56 - 65	38 patients	26.3%
Age 66 - 75	34 patients	23.6%
Age >75	24 patients	16.6%

ABOUT GAYLORD HOSPITAL:

A nonprofit, 137-bed specialty hospital, also known as a long-term acute care hospital, Gaylord specializes in medical management and rehabilitation for patients who have experienced an acute illness or a traumatic accident.

Gaylord is among the best in the country at helping patients recover and return to the highest quality of life. From simple to catastrophic situations, we bring together all of our clinical resources to deliver the best possible outcomes.

By offering a continuum of care from inpatient to outpatient services, Gaylord can meet the needs of our patients through every stage of recovery.
